TECHNICAL SKILLS

AI & Automation Claude API · OpenAI API · LLM Orchestration · Prompt Engineering · Agentic Workflows · NLP · Power Automate
Data & BI SQL · Transact SQL · Python (Pandas) · Excel VBA · Power BI · Tableau · Snowflake · Data Modeling
CRM, Cloud & Integration Salesforce · Azure AD B2C · Microsoft Azure · AWS · ServiceNow · REST APIs · ETL Pipelines · Postman
Product & Delivery Agile · Scrum · Product Ownership · Backlog Prioritization · BRD/FRD · User Stories · JIRA · Confluence · Azure DevOps · UAT · SDLC

PROFESSIONAL EXPERIENCE

Business Systems Manager (Contract)

Jul 2025 – Present

Afghan Human Right Center

- Lead an end to end Salesforce integration strategy across NPSP donor management, incident to Case automation, and custom HR objects, serving as the primary bridge between business stakeholders and technical implementation.
- Drive project execution across Monday.com (sprint boards, backlog prioritization), Google Workspace, and Salesforce, coordinating CRM, project management, and collaboration tools across a distributed team.
- Evaluated building a custom Dari language NLP model against AI APIs and chose a 3 tier routing strategy, eliminating the need for labeled training data, GPU infrastructure, and months of ML development while cutting classification costs ~90% through model selection and prompt caching.
- Architected a confidence based AI routing system, auto approving high confidence results, queuing mid range for human review, and escalating edge cases to advanced models.
- Architected a dual provider AI integration (Claude and OpenAI) with automatic failover, classifying human rights incidents across 13 categories in Dari and English.

IT Business Systems Analyst

May 2024 – Jul 2025

Equity Residential (S&P 500, NYSE: EQR), Boston, MA

- Owned and prioritized a unified cross team backlog spanning infrastructure, security, development, and DevOps, sequencing by business impact and dependency.
- Coordinated seven cross functional teams as the single point of alignment, keeping Infrastructure, SecOps, DevOps, and business stakeholders synced on dependencies and deadlines.
- Built stakeholder dashboards in Power BI and Azure Monitor Workbooks (SQL + KQL), tracking daily login success/failure, MFA completion, and migration progress.
- Analyzed MFA SMS costs (\$0.03/message) against login friction to drive a device recognition fix, cutting repeat MFA prompts for returning users by an estimated ~80%.
- Designed the ETL behind a renter facing pricing feature, scheduled jobs that pulled from source systems, computed trailing average utility estimates, and loaded a staging layer, with per record error logging to isolate bad data.
- Designed a 5 procedure Transact SQL workflow, a master procedure computing fee amounts and triggering downstream inserts, with step and error logging to isolate failures.
- Eliminated roughly 5 IT change requests per day by designing a self service admin tool, giving Marketing direct control over charge codes, display copy, and pricing overrides instead of filing tickets.

Sales Consultant

Oct 2021 – Sep 2023

Equity Residential (S&P 500, NYSE: EQR), Santa Clara, CA

- Managed a full sales pipeline of 150+ monthly leads in CRM, owning each stage from inquiry to signed lease, and lifted tour to lease conversion (win rate) by 18% through targeted follow up and lead prioritization.
- Drove customer acquisition and retention by partnering with marketing and operations on campaigns and renewal outreach, defining and tracking KPIs (occupancy, renewal rate, cost per lease) that improved retention 12% year over year.

IT Business Systems Analyst

Jan 2019 – Aug 2021

ConnectionHub / ARSA, Istanbul, Turkey

- Translating high level problem statements from the strategic roadmap into comprehensive epics, user stories, and functional requirements documents.
- Produce regular reports and analysis, write systems queries to gather data, perform data mining and analysis using tools including MS Excel, SQL, and Tableau.
- Collaborated with 15+ cross functional contributors to build and launch 2 platforms serving 500+ refugee learners, managing vendor relationships with technology providers and coordinating international stakeholders.
- Developed and maintained technical documentation including data dictionaries, process flows, and onboarding guides, cutting new team member ramp up time from 4 weeks to 2 weeks.
- Instituted Acceptance Test Driven Development (ATDD) as the team standard across a 5 country distributed team, reducing post sprint rework across 10+ platform features by defining pass/fail criteria collaboratively with developers.

EDUCATION

MS Management Studies, Data Analytics (STEM) · Boston University, Questrom School of Business

2024

AI 360: Artificial Intelligence & Machine Learning · Cornell University

2026

BA Aviation Management · Kocaeli University, Turkey

2019

CERTIFICATIONS

Google BI Professional (2024) · PMP/PMI (In Progress) · NYU MicroBachelor in Computer Science (2022) · Harvard CS50x, CS50P, CS50 SQL (2024–25)
